

Plan del Manejo Integrado de Plagas y Revisión del Uso de Plaguicidas en el Distrito

Distrito Escolar Unificado de Capistrano

13 de agosto de 2026

El Distrito Utiliza un Plan de Enfoque de Manejo Integrado de Plagas (MIP).

IPM

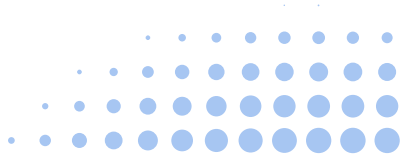

Integrated Pest Management

A practical approach to managing pest conditions while reducing unnecessary pesticide use.

HOW THE APPROACH IS USED

- **Prevent** Reduce conditions that attract pests.
- **Monitor and evaluate** Identify the condition and determine the level of need.
- **Control** Use appropriate non-chemical methods when practical.
- **Treat** Apply a targeted pesticide product when necessary.

SINCE 2017 The District has not used glyphosate on District-owned or District maintained properties

La Ley de Escuelas Saludables guía los procedimientos de Manejo Integrado de Plagas del Distrito.

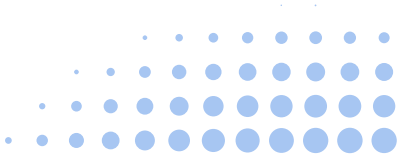

ESTABLISHED PROCEDURES

● IPM coordination and planning	A designated IPM coordinator and published IPM Plan
● Training	Annual training for employees who apply pesticides
● Notification and posting	Annual product notification and required application notices
● Recordkeeping and reporting	Application records and required pesticide-use reports

PROCEDURE BEING STRENGTHENED

Staff is establishing a centralized process through which parents, guardians, and employees may register to receive advance notice of individual pesticide applications.

The centralized process will provide the required 72-hour advance notice.

La Notificación anual Identifica los Productos que Pueden Utilizarse Durante el Año Escolar.

5

HERBICIDES

Landscape weed management

15

INSECTICIDES

Ants, cockroaches, and other insects

3

RODENTICIDES

Rodent management
