Addendum No. 2

TO: Proposers

FROM: Laura Medina
Contracts Analyst

RE: RFP No. B2027-02
Network Switching Equipment (E-Rate)

The following questions were received as RFI's for the above referenced RFP:

- Question #1 – “On the RFP (page: 11), the quantity for the "EX4400-48MXP" switches are 125 & the quantity for the "CBL-PWR-C15M-HITEMP-US" power cords are 150. Could you verify that these quantities are accurate?”
Answer #1 – Yes, the quantities are accurate.
- Question #2 – “On the RFP (page: 11), there are quantity 125 "JPSU-2000-C-AC-AFO" switch power supplies, are these meant to be secondary power supplies for the "EX4400-48MXP" switches? Please note the "EX4400-48MXP" switch comes with one power supply included.”
Answer #2 – Yes, they are secondary power supplies and they are needed to meet our PoE requirements (the switches will produce less power for PoE with only one power supply per switch).
- Question #3 – “Is part number: "PC-C15M-HIT-US" (PC, AC, US, C15M ,2.5m, StrtN5-15-Strt HTC15M Power Cord AC US/Canada C15M 13A/125V) acceptable as a replacement for the "CBL-PWR-C15M-HITEMP-US" power cord mentioned on the RFP (page: 11)? Please note the "PC-C15M-HIT-US" is an OEM accessory part number for the "EX4400-48MXP" switches.”
Answer #3 – Yes, "PC-C15M-HIT-US" is acceptable as a replacement for "CBL-PWR-C15M-HITEMP-US".
- Question #4 – “Is "SVC-COR-EX44-48XP" Juniper Core Support for EX4400-48XP required? ”
Answer #4 – No, "SVC-COR-EX44-48XP" isn't required because "S-EX-S-C3-5M2-C-E" includes the core support. As long as we have "S-EX-S-C3-5M2-C-E" we will not require "SVC-COR-EX44-48XP".

Addendum No. 2 - continued

- Question #5 – “For the 30 SFPP-10G-LR-C optics, will Juniper SFPP-10G-LRT2-C be accepted as an equivalent, subject to Juniper compatibility documentation? The proposed item is a 10GBASE-LR Type 2, single-mode, 10 km, duplex-LC optic. We have not treated it as approved.”

Answer #5 – Yes, it will be accepted as an equivalent, subject to Juniper compatibility documentation.

- Question #6 – “For the 150 CBL-PWR-C15M-HITEMP-US cords, is the current ordering SKU PC-C15M-HIT-US acceptable? Please confirm the intended input voltage/plug configuration. Juniper's EX4400 documentation distinguishes the power cords for the 2000W MXP model.”

Answer #6 – Yes, it is acceptable. The intended input voltage/plug configuration is 13 A / 125 V NEMA 5-15.

- Question #7 – “Addendum 1 confirms ZIP 92075 and loading-dock access. Please provide the delivery street address and any receiving hours or appointment requirement needed for an accurate freight quote.”

Answer #7 – Delivery address is 155 Stevens Avenue, Solana Beach, CA 92075. Receiving hours are between 8:00 am and 3:00 pm Monday through Friday.

- Question #8 – “The non-collusion form prints "California" as the execution location. May an out-of-state proposer enter the actual Alabama execution location without changing the substance of the declaration?”

Answer #8 – Yes. A Non-Collusion Declaration required by California Public Contract Code (PCC) § 7106 can be legally executed outside the State of California. To ensure the execution is valid and accepted by the school district without risk of bid rejection, a) include the required language above the signature line: "under penalty of perjury under the laws of the State of California"; b) state the location and date: clearly list the execution date, city, and state [if not California, cross-out California as the execution location on the form] (e.g., Executed on October 15, 2026, at Phoenix, Arizona).

- Question #9 – “For our E-Rate deadline control, please confirm the current Allowable Contract Date for Form 470 270000607 or provide the published form. We are recording it separately from the November 6, 3 PM Pacific sealed-bid cutoff and want to account for any revision that changed the ACD.”

Answer #9 – The Allowable Contract Date for Form 470 270000607 is November 4, 2026.
