

## Professional Development |

- ☐ Hatching Results:
  - ☐ We continue to partner with Hatching Results to provide coaching for our school counselors. This month the administrators joined us for our virtual session with Tara Schwerdt. We focused on the proactive, data-driven transformative role of the school counselor and strengthening the administrator-school counselor working relationship using the Annual Administrative Conference template

## Assessment |

- ☐ The California School Dashboard will be made available to the public on November 13th. The LEA preview will open on November 6th.
- ☐ We have started gearing up for the spring state testing by calendaring our testing windows and completing ELPAC Summative training.

## State &amp; Federal Activities |

- ☐ We have held two SARC (School Accountability Report Cards) workouts this month where the site principals had dedicated time to start on completing their site's SARC. Now we are just waiting for the CA Dashboard data to complete the rest of the report. You'll see the completed reports in February.
- ☐ To gather parent input for our Title I and III needs assessments I partnered with the Murdock ELD teachers at the Fall Festival. While kids came to get their fortunes told, we surveyed the parents as they waited for their child.
- ☐ November 19th from 5:30-6:30 we are holding our first combined DELAC (District English Learner Advisory Council and site ELAC (English Learner Advisory Council) at the WIS library. We have changed the name to Family Voices for English Learners to give parents more context for the meetings. Students from the different sites will lead brief activities similar to what they do in ELD class so parents can see what their students do when they attend ELD. After that sites will then break off into individual classrooms for site specific activities and information.

## Safety |

- ☐ Steven Permann, Michelle O'Dell and Emmett Koerperich were able to attend the annual Golden State Risk Management Conference
- ☐ Willows USD has completed the first portion of the RMAP—the Compliance Documentation. Thank you to Steven Permann, Diana Baca and Emmett Koerperich and others for helping gather that information. We had to add some property and delete some buildings to update the information they had on record so it was more accurate (e.g remove the mobile kitchen and a greenhouse that was listed twice, and add the Murdock 800 wing that was missing).
