

Table Mountain School

A Community School Implementation Update, 2025–26

Table Mountain School is part of a statewide effort to make schools stronger hubs for students and families — shaped here by decisions we make together with our students, families, and community.

76.9%

Students Have Academic Support

say they can access help when they need it

What This Looks Like at Table Mountain School

Real College Credit

11 students earned college credit through Butte College this year, with support connecting to financial aid and college counselors.

One Student at a Time

Teachers use regular assessments to understand where each student is, then provide weekly one-on-one academic support alongside a special education teacher.

Support For Every Student

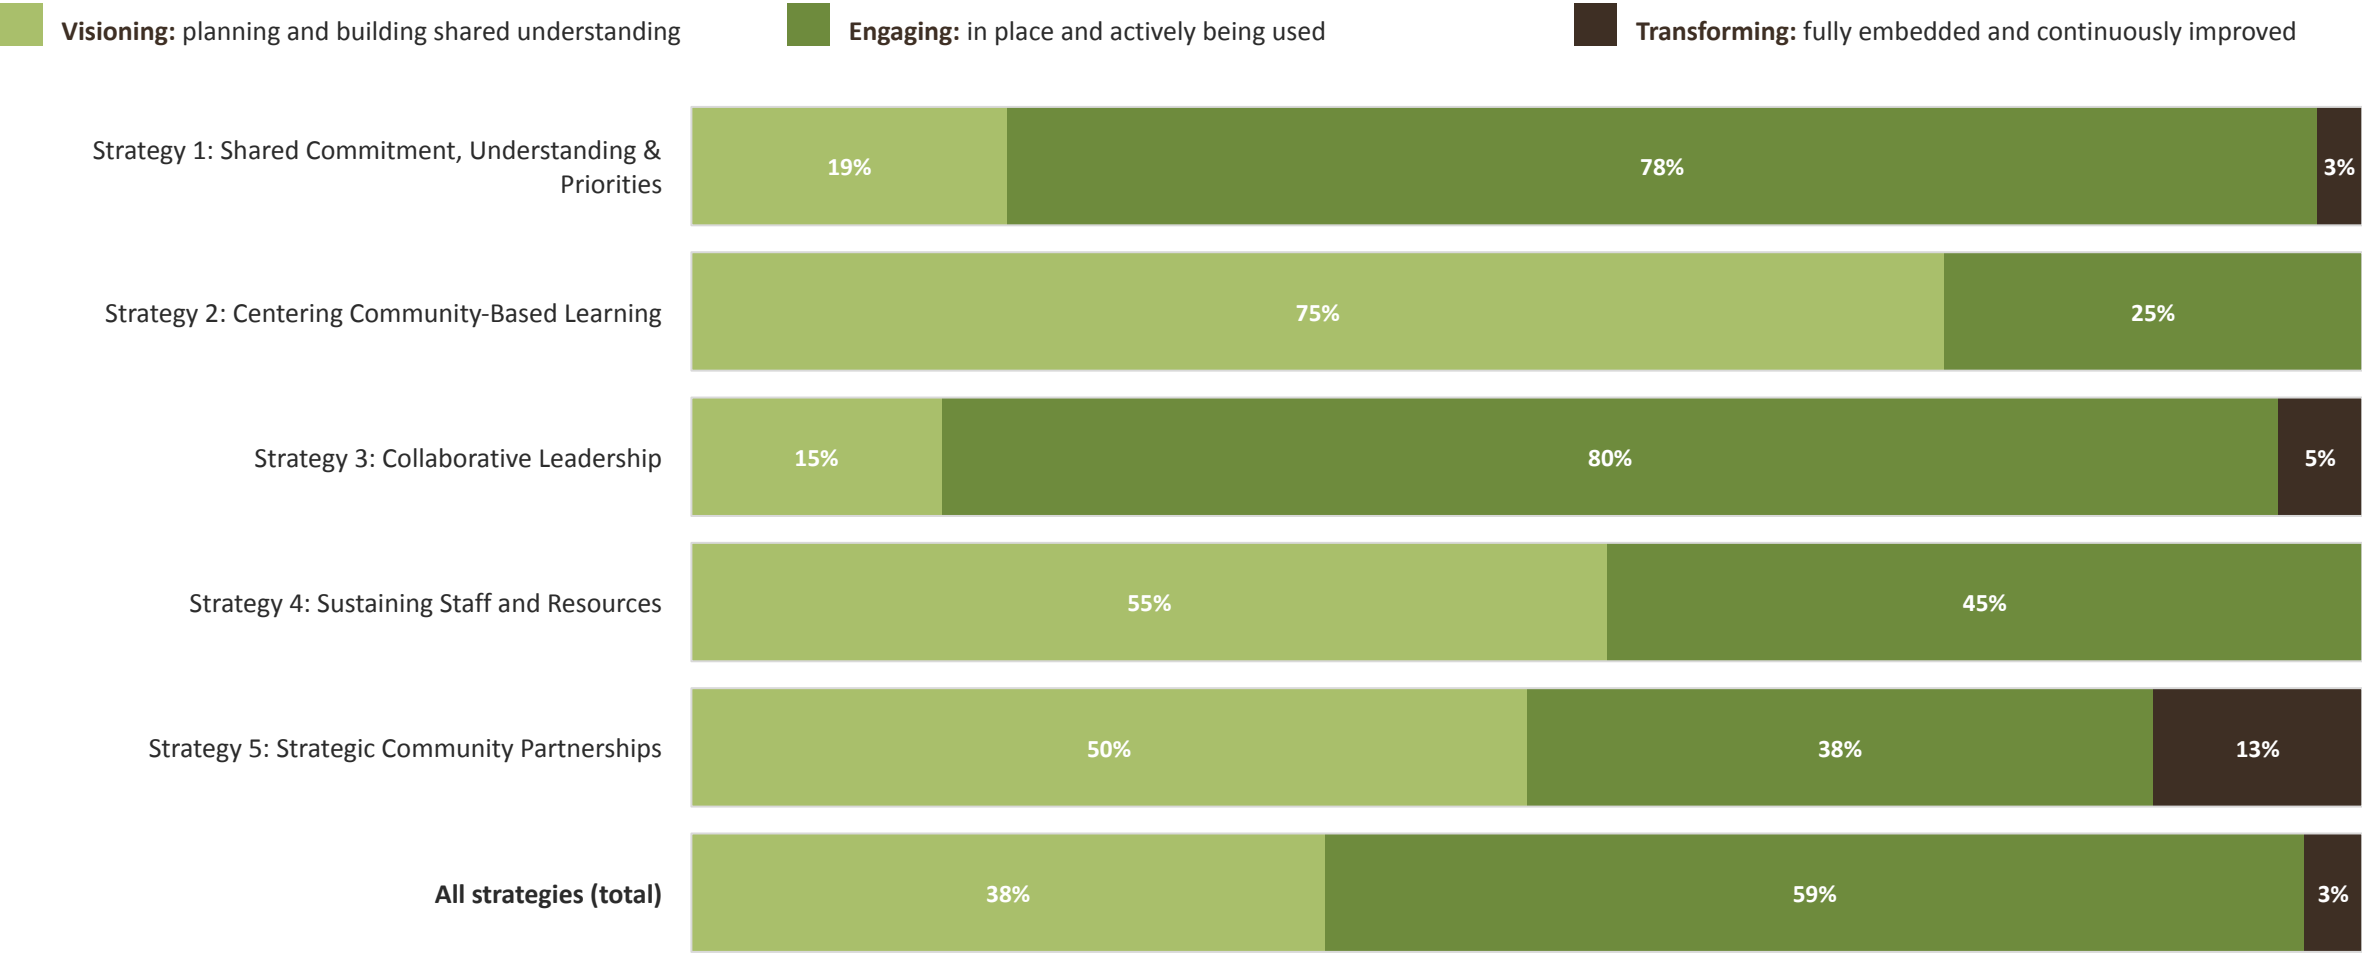

Weekly social-emotional learning sessions, a positive-behavior rewards system, and a Transition Specialist help build a plan around each student's needs.

Our Partners: *Butte College and the Boys & Girls Club of the North Valley work alongside us to support our students and families.*

Curious how this work is progressing school-wide? See the next page for a closer look at how our Community School practices are growing.

How Our Work Is Growing

We're implementing five strategies behind our Community School work. Some are already a strong part of how we run things every day — others are still taking shape. Students, families, staff, and community partners' voice helps guide this work!

Our Priorities This Year

One Student at a Time Building an individual path forward for every student, grounded in our own philosophy of personalized learning.

Partnerships That Support Our Students Working with Butte College, the Boys & Girls Club, and other community partners to open doors during and after a student's time here.

Learning Connected to Real Life Connecting coursework to real college and career opportunities, so learning has a clear purpose.

What We're Doing — And What's Next

Getting Students to Graduation

What's working: Our graduation rate has grown to 76.9% — up 41.2 points. Students are also earning real college credit through Butte College, with 11 students enrolled in college coursework this year, and support connecting with financial aid and college counselors.

What's next: We're building a more consistent schedule of college and career events throughout the year, so more students have access to these opportunities earlier.

Learning That Fits

What's working: Teachers use regular assessments to understand exactly where each student is, then provide weekly one-on-one support alongside a special education teacher and support staff.

What's next: We're expanding into extended summer sessions and keeping an intensive focus on reading, writing, and math support for every student.

Support Beyond the Classroom

What's working: Weekly social-emotional learning sessions help students build confidence and skills, paired with a positive-behavior rewards system. Students also work with a Transition Specialist who attends family planning meetings to help build a plan built around each student's needs.

What's next: We're continuing to strengthen these supports as students prepare for what comes next.

A Calmer, More Focused Campus

What's working: 84% of students rate our school climate positively — up 6% from last year — and 100% of students say they have access to the academic support they need.

What's next: We're working to make family events easier to attend, with more advance notice and more focus on the career and goal-planning content families have told us they want.

Your Voice Shapes This Plan

Our students, families, and staff helped shape this plan through surveys and everyday conversations at Table Mountain School. Full data and reporting are available in our LCAP/SPSA.
