This notice is to inform the public and interested agencies that in accordance with the California Environmental Quality Act (CEQA), the Sequoia Union High School District (District) is circulating for public comments the Initial Study/Mitigated Negative Declaration (IS/MND) prepared for Sequoia High School Facilities Master Plan.

### Project Description

The proposed Facilities Master Plan project at Sequoia High School includes construction of a new approximately 14,000-square-foot, two-story classroom building near the athletic field. The building would contain eight classrooms, student support services, restrooms, outdoor seating, and related site improvements. An expansion of the existing arboretum is also proposed to create an outdoor classroom.

The project also proposes substantial renovations and modernization of existing campus facilities, including seismic retrofitting and interior and systems upgrades to the historic Main Building; improvements to the Multi-Use Room to enhance indoor-outdoor connectivity; modernization of the boys' and girls' locker rooms; and replacement of stadium lighting.

Additional upgrades include improvements to Carrington Hall, the Student Activity Building, and stadium support spaces; installation of photovoltaic panels; roof resurfacing; restroom renovations; exterior repainting; artificial turf and drainage improvements at athletic fields; and lighting upgrades.

The proposed project would not increase overall student enrollment capacity and, in some cases, would be evaluated at a programmatic level pending more detailed design.
