NETWORK ADMINISTRATION

The Internet Behind the Scenes

This class shows students what's really happening behind the internet they use every day — from gaming and streaming to social media and apps. Students learn how networks are built, how Wi-Fi actually works, and how devices connect and communicate behind the scenes.

Students build and manage real networks, configure equipment, and troubleshoot connection problems used in gaming, streaming, social media, and apps. This hands-on course develops practical, in-demand technology skills used in networking and IT careers.
