I WAS A STUDENT AT COA

COA, through its prior iterations, has been essential in developing my educational framework, solidifying my knowledge of the Russian language, as well as providing me with a network of individuals that yields results to this day. After COA and high school, I was able to get Associate Degrees in Engineering, Mechatronics, and Choir Conducting. After graduating from law school and passing the California Bar, I was able to open my own law office, practicing Business and Estate Planning, serving the community I grew up in. I was also able to publish several books, as well as continue my theological education, with a goal of becoming a Doctor of Theology.
