Future Ready North East: To Deliver the Best Education on Earth

NEISD mission of educating kids and embracing innovative practices is that we believe that we exist to produce great kids and scholars.

NEISD should not settle for anything less than discovering our best. If learning is not up to the highest standards, we must evaluate, adjust, and do whatever it takes to ensure learning for all our kids. Our reputation for high-quality learning has been well-known for decades, and with every new initiative, success story, and pillars of society; it further cements that reputation in the eyes of our public.

Furthermore, we are committed to staying at the top and maintaining our sterling reputation. Not only do we seek to develop great students, we must know that our goals can not change. This tells our parents, students, staff, and patrons of NEISD that we will stay focused on our goals to be the best. This perception of stability and faithful execution of our mission inspires great confidence.
