Meet HI-5:

Contactless Check-In for Students

We are launching the HI-5 Wave Scanner, a fast, touch-free way for students to check out for breakfast and lunch using a quick hand wave. The system uses safe technology to create a secure, encrypted code, **no photos, fingerprints, or images are stored** & students can also choose to use a PIN or barcode instead. This optional system helps reduce wait times in the cafe, eliminates the need for ID cards, and creates a safer, more convenient daily experience for students while protecting their privacy.
