Keynote Speaker

Danielle Feinberg

The Art of Science:

The Challenges of Bringing Imagined Worlds to Life

A 28-year veteran of Pixar Animation Studios, Visual Effects Supervisor Danielle Feinberg reveals how STEM secretly powers the magic of animation. At each stop, she explores the blend of math, science, and art that, when used together, brings imagined worlds to life. With examples from her own life and movies like Finding Nemo, WALL-E, Coco, Turning Red, and more, she will deliver a behind-the-scenes look at problems big and small and their hard-fought solutions.

Invitation for Parents:

Parents can join a free parent workshop from 9:00 AM to 11:00 AM in the Soda Center, focusing on 'Inspiring Girls to Thrive in STEM'. A guest speaker and panel of local high school and college students will share their experiences in the study of STEM.

Amazing Workshops

- "Be a Bee"
- Make Code Move
- Structures, Bridges, & Engineers
- Day in the Life of a Vet
- Exploring the Human Brain
- FBI Crime Scene
- Cool Chemistry
