

Addendum No. 1 to

RFP 2526-03 Category 1 Data Transmission/Internet Access (Upgrade) (E-Rate) 470#260001124

Addendum Dated: October 20, 2025

Original RFP Issued Date: October 1, 2025

All clarifications, updates and questions received are posted below with corresponding answers.

Q1: Are you willing to offer extension, to allow more time for bid bond since that alone can take up to 2 weeks.

A: No. An extension will not be offered.

Q2: The 470 calls out bandwidth up to 25G. Will each handoff/port (location) support 40G, or 100G optics?

A: Currently our equipment supports up to 10GB at each site.

Q3: For the hub location at 13030 Ashley Falls Drive. Will you be using an aggregate UNI to map VLAN IDs, or will you be using separate UNI ports for each spoke location?

A: We'll be using a single aggregate UNI at Ashley Falls School (13030 Ashley Falls Drive). Each school site currently connects through its own 1 Gbps circuit and is mapped to a unique VLAN ID across the 10 Gbps collector circuit that terminates at Ashley Falls.

Q4: For your connection to the San Diego County Office of Education, which provides Internet service. Is this connection also going back to the hub at Ashley Falls Elementary School?

A: Yes. SDCOE connected directly to Ashley Falls and then Ashley Falls connects to all other schools/sites.

Q5: If I need to register at a portal or prequalified, please let me know and we will do the needful.

A: There is no requirement for portal registration or prequalification.
