IPM statement

It is the goal of Reeds Creek ESD to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

1. Maintain a safe and clean educational environment
2. Mitigate pest in the least invasive method/practice possible
3. Implement this Integrated Pest Management Plan in accordance with state guidelines and comply with the Healthy Schools Act
