Re: **Public Health Pesticide Application Notification**

Dear Agency:

The Sutter-Yuba Mosquito & Vector Control District (District) may be making public health pesticide applications to waters of the U.S. under your jurisdiction for mosquito control to prevent mosquito-borne diseases, such as West Nile virus. The District will be using larvicides and adulticides listed in the National Pollutant Discharge Elimination System (NPDES) permit for biological and residual pesticides discharged to waters of the United States for vector control operations. Pesticide applications are made according to product label directions and do not impose any water use restrictions or precautions on your agency.

Attached is a list of active ingredients that the District could potentially use. The District may make applications between January 1 and December 31 of this year. However, the majority of applications generally occur between May 1 and October 31. The District is required to notify all government agencies that may be potentially affected by these applications under the requirements of the general NPDES permit. Please contact Stephen Abshier at 530-674-5456 ext. 101 or Joe Songer at ext.106 if you have additional questions.

Respectfully,

Stephen Abshier
District Manager
