IPM statement

It is the goal of SAN PASQUAL VALLEY USD to implement IPM by focusing on long-term prevention or suppression of pests through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

Our district is committed to preventing pest problems through proactive practices and routine monitoring. We prioritize the use of least-toxic, environmentally responsible methods to manage pests effectively while minimizing risk. Above all, we are dedicated to protecting the health, safety, and well-being of our students and staff by maintaining clean, safe, and healthy learning environments.

IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Terminix	Applicator - Pest control company

Pest management contracting

- Pest management services are contracted to a licensed pest control business.
Pest Control Business name(s): TERMINIX
- Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

Pest identification, monitoring and inspection

Pest Identification is done by: Terminix Representative
(Example: College/University staff, Pest Control Business, etc.)

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by SITE CUSTODIAN and results are communicated to the IPM Coordinator.
(Example: District staff title, e.g. Maintenance staff)

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:
(Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)

As part of daily cleaning routines, custodians monitor their assigned areas for insects and other pests. Sticky boards are strategically placed—such as behind furniture and under desks—to help identify and track the types of pests present.

Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
