Construction and Demolition Debris Recycling
Waste Management Plan (WMP)

California Green Building Code requires at least 65% diversion of job-site waste materials from the landfill

Owner Name _____ Permit # _____

Email _____ Phone # _____

Property Address or A.P.N _____

Project Manager Name _____

Email _____ Phone # _____

- 1. Identify the type of materials to be recycled, salvaged or disposed of from the job-site in Section I of the waste assessment table on the back of this page.
2. Identify how materials will be handled, who will haul materials or what facility materials will be going to in Section I of the waste assessment table on the back of this page.
3. Section II is to be filled out with supporting documentation upon completion of project.
4. Briefly state how materials will be sorted for recycling and/or salvage on the job site.

Four horizontal lines for providing supporting documentation for item 4.

5. Will this project require the use of sub-contractors? [] Yes [] No

If yes, briefly state how you plan to inform and ensure participation by the sub-contractors of your job site recycling and waste management responsibility.

Four horizontal lines for providing details on sub-contractor participation.

Waste Assessment

Before Start of Project:

Identify the materials that you estimate will be recycled, salvaged, or landfilled. Identify the handling procedure, hauler and/or destination of each material type.

Upon Completion of Project

Indicate the material **types and quantities** recycled, salvaged or disposed of from this jobsite. Official weight tags must be submitted with this completed report identifying 1) job site address, 2) weight of load(s), 3) material type(s) and 4) if materials were recycled, salvaged or disposed of.

Material Type	Section I Identify materials (✓)	Handling procedure, hauler or final destination of materials	Section II Quantity of each material (by weight)	City use only Acceptable weight tag (staff initials)
