# COMPUTERS & DIGITAL MEDIA

## NETWORK ADMINISTRATION

The Internet Behind the Scenes

This class shows you what's really going on behind the internet you use every day. You'll build and manage networks, set up Wi-Fi, and figure out why connections break (and how to fix them). Learn how things work behind the scenes — gaming, streaming, or apps.

## Computer Essentials A+ & Digital Media

Learn It. Then Create It.

Learn how the technology that powers everyday life really works — then use it to create. In this class, you won't just sit and watch tutorials. You'll take computers apart, build them back up, and fix real problems. You'll also learn how lighting works, film and edit videos, and create commercials for social media, advertising, and the web using the same tools professionals use. It's the perfect mix of tech skills and creativity.

## Cybersecurity, Minecraft & 2D Game Programing

Hack. Build. Create.

Learn how hackers think — and how to stop them. You'll explore real cybersecurity concepts, then jump into coding using Minecraft and 2D game development tools. Build games, write code, and learn how systems stay secure. This course combines cybersecurity concepts, ethical hacking, and coding in a fun, hands-on learning environment.

**Yes** — Minecraft is part of the class.
