Imperial Unified School District

Position on Proposed Data Center

Trustee Holbrook has recused himself from the District's position

To Whom It May Concern:

On behalf of Imperial Unified School District, this letter is to express the District's concerns regarding the proposed construction and operation of a data center within District boundaries.

While the District recognizes the importance of technological infrastructure and economic development opportunities, we believe it is also important that potential impacts to students, staff, families, and the surrounding community be carefully evaluated and addressed.

The District's primary concern is the health, safety, and well-being of our students and employees. Specifically, we encourage careful review of potential impacts related to air quality, noise levels, water usage, traffic, construction activity, and overall community compatibility, particularly due to the proximity of schools and residential neighborhoods.

We also encourage consideration of appropriate mitigation measures, including environmental safeguards, noise reduction strategies, traffic management plans, and ongoing monitoring to help minimize potential impacts to nearby schools and the community.

At a minimum, the District respectfully requests comprehensive environmental review, independent assessments where appropriate, and continued community engagement throughout the planning process.
