

SCOPE:

Provide and install a new 7 foot tall Ameristar Montage Commercial Genesis 3-rail system, with pickets extending above and below the rails (~485 linear feet) and one pedestrian gate equipped with panic hardware at Rancho Tehama Elementary School. The panic hardware is Von Duprin 99 Series, paired with Lockinox Mammoth hinges.

Work includes removal of existing fence, layout and installation of posts in concrete footings, and installation of Ameristar panels and gates per manufacturer's specifications. Fence system will include factory-applied E-coat corrosion protection for durability and low Maintenance.

The new fence must match the existing fence in appearance and quality. The contractor is responsible for maintaining site security at all times during construction. Upon completion, the site shall be left in equal or better condition than prior to construction activities.

All work to be completed in accordance with Ameristar guidelines, industry standards, and applicable codes, resulting in a secure and aesthetically pleasing perimeter for the school.
