Rebels Report

Fall 2026

Flag Football
By Lewis and Seth

Players:
Ezra, Derek, Brock, Zander, Ruger, Brody, John, Seth, Lewis, Cooper, Mason, Jace, Hudson, River

Coaches:
Dustin Russel and Daniel Perry

Richmond School's flag football team had an undefeated season. Richmond played: Westwood, Janesville, Diamond View, South County, and Johnsonville. It was a great season! Thank you to our coaches!

2nd Grade Science

Leadership students Zoey and Macie interviewed several second graders after they soaked multiple eggs in vinegar for 24 hours. Next they found out that the egg shell disintegrated and the vinegar turned brown. Then Mrs. Bruce took out the eggs and dropped them. Some bounced and then some second graders poked the egg with a pencil, and then some eggs exploded. Finally, multiple students recorded when the shell disintegrated it was a chemical reaction.
To add on that project, they also did an apple experiment. During the experiment, the three apples had baking soda, then Mrs. Bruce dyed one apple blue, one green, finally, then one red. Next, Mrs. Bruce poured vinegar into the apple and made it explode like a foam-like substance. The explosion was very colorful and at the end the second graders learned that when you sometimes mix multiple things, it can cause a reaction.

4th Grade Catapults
By Kinsley W.

My class made catapults out of 3 materials: such as sticks, rubber bands, and a spoon. We learned about **balanced** and **unbalanced** forces. We got to design our own catapult first. My first design looked like a snowflake. When we launched it the first time, we got a distance of 6 inches and 23 inches. The first time I looked around the classroom I saw a lot of different types of catapults. I saw really long ones, short ones, and guess what I saw, not one catapult looked like mine. The new design we all did as a class all looked the same, and we launched our marshmallows way farther this time, up to 45 inches. We went to the front of the school to launch because every day TK-1st goes outside before dismissal, which is when we did it. Plus, it was windy, and we didn't have wood chips in our eyes and the little ones could eat the marshmallow that was sling shotted across the grass. It is just a smart idea to go up front.

Purple Out Pep Rally
By Lincoln and Ryan

The Purple Out Pep Rally was a blast this year! We started off with students from each grade playing hungry hippos. They each had one hula hoop and then tried to get the balls in the middle into their basket. Next, we played Head, Shoulders, Knees, and Cup! It was a success, 2 people from each grade went against each other to grab the cup first. Lastly, we played musical chairs. We started with kids from the lower grades playing normal musical chairs. With the upper grades, we blindfolded them and played musical chairs as they would search for the chairs.

Wrestling

Wrestling season has begun! Richmond has started our first wrestling club after school on Tuesdays. There are about 25 students signed up ready to learn the fundamentals of wrestling. The school has a new wrestling mat which will ensure the safety of all our athletes. Throughout the season you will learn the basics of wrestling like how to shoot, good wrestling stance, etc.
Shout out to Mr. Boyer for this all to happen; we appreciate you!

5th Grade Lava Beds

On September 17-18, 5th grade went on a Lava Beds overnight field trip. On the 17th, we left school and headed to Burney Falls. When we arrived at Burney Falls, we went on a mile hike around the waterfall. Then we headed for Medicine Lake. When we arrived we ate snacks and took class photos. Then we left for Glass Mountain. When we arrived we ate lunch, explored, and took some more photos. Then we left for Lava Beds. We explored the cave loop. After the cave loop, we split into groups and explored the caves. A few hours into the caves it started raining! Since it started raining we left to set up camp. The girls had a tent and the boys had one. When the tents were set up it started hailing! The boys all went in their tent as the girls ran to the restrooms to stay warm because the girls tent was very wet and not fully set up yet. After a while, it stopped hailing and we all put on dry clothes and ate burgers and hotdogs for dinner. Then we roasted s'mores and sang campfire songs such as "Bazooka Bubblegum" and "Purple Stew." In the morning, we had hot cocoa and breakfast burritos. After breakfast, we cleaned up camp and left for a hike. After the hike, we went to Captain Jack's Stronghold. We went on a hike at the Stronghold then we ate lunch there. Finally, we all left for home. That was the 5th grade Lava Beds trip.

6th Grade Camp

Kadence Ramsey

6th grade camp started out as a 4-mile hike with Mrs. Hutchinson, we played a predator vs.. prey game and had lunch halfway through. We then arrived and set up our cabins, then played capture the flag and ate spaghetti. It was AMAZING. We then got into comfy clothes and did our skits and ate s'mores at the campfire. Finally, down time and showers. We also got very kind speakers, like George the Trapper, who showed us how to trap bears, and Josh the Trapper (Harpers Dad) show us how to trap squirrels. It was so fun. The first morning, at 5:00, the power went out and the fire alarm went off. Blue team had to carry lake water up to the cafeteria so we could have water (we boiled it). Wednesday went well with activity electives. For the campfire, we did ASL lullabies and had the bussenest (best) brownies. We then went on a night hike to look at the Moon and Saturn, but we only got to see the Moon, and not Saturn, my favorite planet.Thursday was fun, we went on a plant hike, had a sack lunch, and went home.

5th Grade Volume Zoo

On Sep 24, 2026, in the gym at 8:30-11:00 we had the Volume Zoo. We decorated the gym with a savanna section. We also had an ocean group, an arctic group, a lake group, a forest group and a jungle group. Carter built a Killer Whale/Orca. TeAta made a horse that did not have a habitat. Gracie created a bear. Adalee made a penguin. Jace built a cheetah. Olivia created an ostrich. Alex did a giraffe. Landon made a rhino. Melanie built a koala. Levi built an elephant. Ariannah made a whale shark. Koda built a baby seal. Archer created a sea turtle. Adelyn made a duck. Cameron created an axolotl. Luke made a crocodile who took naps during our zoo time. We had to find the volume of each animal by measuring the side lengths of the box then multiplying the length times width times height. Then we added the volume of each box to find the total volume. We also had to research our animal so we could share facts with our zoo visitors. We had a lot of fun making and sharing our animals with the school.

Girls Basketball

By Avery Davis and Remy Reed

Coaches: Jeremy Wong, Taylor Hanson, Rudy Alkire
8th Grade Players: Makayla, Macie, Scarlett, Kaydance
7th Grade Players: Emmy, Avery, Remy
6th Grade Players: Kinley, Eleanor, Cora, Estee, Annabelle, Harper, Anna, Katie, River

Girls basketball is going great! The girl's first game is Tuesday, October 27,
against Johnstonville. The girl's second basketball game is Thursday, October 29, against Westwood. Good luck, Rebels! The Richmond Tournament is starting Thursday, November 5-7th. Hopefully we will have a good season! Go Rebels!
