AGENDA TOPIC: District Plan for Committee on Assignment

PRESENTER: Michelle O'Dell, Director of Curriculum, Instruction & Assessment

BACKGROUND INFORMATION:

Each year WUSD submits teacher credentialing information, course assignments, teaching positions, school sites and grade levels taught during our CALPADS Fall 2 submissions. The Commission on Teacher Credentialing—a California Statewide Assignment Accountability System— then determines whether those assignments are appropriate. Districts do not get that information back until late September of the following school year.

To avoid additional misassignments in the 2025-26 data, we looked at the misassignments and errors from 2024-25, and we have changed some of the Educational Codes for the teachers placed on the District Committee on Assignment. This will help us avoid those misassignments for next year.

The list contains the same teachers who were previously assigned; we've just added the Ed Code after the subject and grade.

RECOMMENDATION:

Approval of the revised District Plan for Committee on Assignment.

Thank you!
