

Twin Rivers Unified School District has collaborated with American River College to create Dual Enrollment opportunities for our students. The Dual Enrollment program allows TR students to earn college **credits while simultaneously earning high school credits**. Below shows the **ARC courses offered** in the 2025/26 school year, and the high school credit they receive. Students have the potential to earn an Associate Degree in Social Science or a General Science by the time they graduate high school. Classes and enrollment are not guaranteed.
